UPDATES ON ESSENTIAL ISSUES

Friday - Saturday
October 27-28, 2017

Shoreline Conference Center
18560 1st Avenue NE
Shoreline, WA

Sponsored by UW School of Medicine
Department of Anesthesiology & Pain Medicine
Office of Continuing Medical Education

10th Annual John D. Loeser Pain Conference:

Updates on Essential Issues

October 27 - 28, 2017

For primary care providers (PCPs) working in clinic settings where they manage and work with acute or chronic non-cancer pain patients. Other interested parties may include providers in rehabilitation medicine, occupational medicine, psychiatry, physical therapy, and trainees in all of the above fields.

COURSE DESCRIPTION

The John D. Loeser Pain conference provides cogent, evidence-based and useful information for primary care providers of all kinds. Chronic pain is a very common complaint, and many providers find treatment challenging with or without opioid prescribing. The lectures will cover many topics, including safer approaches to opioid prescribing, the use of buprenorphine in pain and addiction, the use of complementary medicine in pain, and special topics including abdominal pain, nerve pain, and using technology in pain treatment.

Presentations are given in a lecture format with a question and answer session after each section. The syllabus will be available online (for conference registrants only).

COURSE FEES	
MD/DO/PhD	\$299
Allied Health	\$249
Resident/Fellow	\$125

**Resident/Fellow rate requires written confirmation of current resident/fellow status.*

ACCREDITATION

Accreditation with Commendation

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation

The University of Washington School of Medicine designates this live activity for a maximum of 12.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

COURSE OBJECTIVES

Upon completion of this activity, attendees should be able to:

- Evaluate spinal pain in an efficient and clear manner.
- Educate patients about managing pain while staying on schedule.
- Develop a sound non-opioid pain treatment plan.
- Describe the pharmacology and use of buprenorphine for chronic pain.
- Help patients with pain-related disability negotiate the disability system.
- Understand the uses of antidepressants in pain treatment.
- Apply complementary medicine options to common pain issues.
- Evaluate and know when to refer for abdominal pain, pelvic pain, and headache.
- Appreciate the regulatory environment around pain care and opioid prescribing and describe best practices for this.
