Emergency Radiology 2026

Sunday - Tuesday
August 2-4, 2026

UW South Lake Union Campus
Orin Smith Auditorium
850 Republican Street
Seattle, WA 98109

Sponsored by UW School of Medicine
Department of Radiology
Office of Interprofessional Continuing Education

TARGET AUDIENCE

The primary audience will be radiologists (residents, fellows, and practicing radiologists) and imaging technologists. Other practitioners in Emergency Medicine may also find the imaging approach and interpretation useful – such as PAs, NPs, and MDs working in emergency departments.

COURSE DESCRIPTION

This course reviews the imaging of trauma and stroke, with an emphasis on diagnosis, management, and critical decision-making in the emergency setting. Topics include musculoskeletal trauma, pediatric emergencies, neurovascular imaging, thoracic injuries, abdominal trauma, and quality improvement practices. Experts from the University of Washington and other trauma centers will share insights from surgery, emergency medicine, neurology, and more.

Through case-based lectures and workshops, attendees will gain practical skills to analyze imaging findings, and guide acute management decisions.

COURSE OBJECTIVES

Upon completion of this activity, attendees should be able to:

- Determine appropriate imaging and transfer protocols.
- Gain more familiarity with common and uncommon conditions encountered in emergency radiology.
- Provide appropriate recommendations for incidental findings.

ATTENDANCE POLICY

Course activities are exclusively reserved for registered attendees.
