

January 27, 2025 at 10:00 AM – 12:00 PM

Location: Zoom

Description: Identity, Privilege, and Intersectionality Define and be able to articulate the meaning and manifestation of intersectionality relative to race/ethnicity Understand and be able to articulate your own social identities Integrate these understandings into all aspects of your personal and professional life and be able to illustrate how they are manifested in your professional lives History of Race and Racism in Medicine and Science Understand the way medicine/science has been used to create and further racism Understand the history of the creation of racial categories and hierarchy, particularly by physicians, and how that framework is still used in modern medicine Recognize race as a social and political construct Explain how and why race is not biological or genetic Social Determinants of Health Define social determinants of health and health inequities Understand how social conditions influence health Describe elements of the Social Ecological Model and Life Course Model Explain the relationship between SDOH, racism and racial health inequities Gender and Sexual Diversity Appreciate the range of gender diversity and variations in sexual identity. Recognize the importance of having both competence from the standpoint of medical knowledge as well as having a culturally informed approach with patients and/or colleagues with life experience and identities that differ from your own. Apply trauma-informed principles when providing medical care for patients and be aware that some have experienced trauma in healthcare settings. Bias and Microaggressions Define key terms related to bias and microaggressions. Explain how microaggressions are harmful and associated with bias. Describe four psychological processes that fuel biased actions. Describe helpful ways to respond to microaggressions based on my typical role in these incidents (as a leader, bystander, target, or offender).
