

October 2, 2024 at 12:00 PM – 1:30 PM

Location: Hybrid

Description: University of Washington's TelePain program is rooted in the rich history of UW adopting a multidisciplinary, biopsychosocial framework to the study and management of pain. The goal of TelePain is to engage and empower learners through evidence-based education and interactive case-based learning, to provide comprehensive high quality pain care for the patients in their respective communities. TelePain uses videoconferencing to bridge geographic distances and maximize the community of learners. Our philosophy is that providers will learn, not only from a panel of interprofessional pain specialists, but also from and with each other. Providers are encouraged to share both their challenges and successes and to offer suggestions for educational topics of interest. Didactic presentations are given by one of our TelePain team members or specific content experts that address common challenges in the management of pain in the primary care setting. Our curriculum is closely aligned with the International Association for the Study of Pain's discipline-specific and interprofessional curricula as well as recently established core competencies for pain management.

Accreditation Statement:

Accreditation with Commendation: The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation:

The University of Washington School of Medicine designates this Live Activity for a maximum of 1.50 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Other Healthcare Professionals

Other healthcare professionals who participate in this CE activity may submit their statement of participation to their appropriate accrediting organizations or state boards for consideration of credit. The participant is responsible for determining whether this activity meets the requirements for acceptable continuing education.
