

## **“15<sup>th</sup> Annual Comprehensive Hematology & Oncology Review Course”**

### **DISCLOSURE INFORMATION**

The University of Washington School of Medicine requires any person in control of content disclose any financial relationships with ineligible companies whose products or services are discussed in educational presentations. Disclosure of a relationship is not intended to suggest or condone bias in any presentation, but is made to provide participants with information that might be of potential importance to their evaluation of a presentation. The ACCME defines an ineligible company as a company “*whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients.*”

The University of Washington School of Medicine is required to “mitigate” any conflicts prior to the educational program. Therefore, in light of the relationships/affiliations designated, each person in control of content has attested that:

- recommendations for patient care are based on current science, evidence, and clinical reasoning, while giving a fair and balanced view of diagnostic and therapeutic options;
- all scientific research referred to, reported, or used in this educational activity in support or justification of a patient care recommendation conform to the generally accepted standards of experimental design, data collection, analysis, and interpretation;
- new and evolving topics for which there is a lower (or absent) evidence base are clearly identified as such;
- content avoids advocating for, or promoting, practices that are not, or not yet, adequately based on current science, evidence, and clinical reasoning;
- content excludes any advocacy for, or promotion of, unscientific approaches to diagnosis or therapy, or recommendations, treatment, or manners of practicing healthcare that are determined to have risks or dangers that outweigh the benefits or are known to be ineffective in the treatment of patients.

***All relevant financial relationships listed have been mitigated.***
