Office of Continuing Medical Education**

WHO SHOULD ATTEND

The primary audience will be radiologists (residents, fellows, and practicing radiologists) and imaging technologists. Other practitioners in Emergency Medicine may also find the imaging approach and interpretation to be useful – such as PAs, NPs, and MDs working in emergency departments.

COURSE DESCRIPTION

Emergency Radiology 2019 will provide comprehensive presentations and interactive discussions covering the broad range of emergency imaging, including epidemiology and mechanisms of trauma, clinicians' expectations of imaging, and an integrated imaging approach to injuries of the head, neck, spine, torso, pelvis and appendicular skeleton.

COURSE OBJECTIVES

Upon completion of this activity, attendees should be able to:

- Rapidly determine the appropriate imaging studies to perform.
- Identify less common clinical conditions that present in the emergency setting.
- Update imaging protocols to optimize diagnostic accuracy while minimizing radiation.
- Accurately interpret emergency imaging studies, and recognize when additional imaging is indicated.
