

## 2nd International Symposium on Merkel Cell Carcinoma April 25-26, 2022

Dear Colleagues:

We are looking forward to hosting the *2<sup>nd</sup> International Symposium on Merkel Cell Carcinoma* in Seattle at the University of Washington from Monday, April 25<sup>th</sup> to Tuesday, April 26<sup>th</sup>, 2022. This hybrid event's [program](#) will feature [MCC experts](#) who will cover various topics from basic biology to current treatment and surveillance guidelines, as well as future therapies on the horizon.

There is still time to submit a **scientific abstract (deadline is Tuesday, Feb. 15<sup>th</sup>, 2022)**. Outstanding abstracts will be selected for short oral presentations and receive complimentary registration to the symposium. Abstracts may also be selected for poster presentations. Please review the [abstract submission information](#).

Due to uncertainty regarding the COVID pandemic, we are prepared to transition the event to a 100% virtual platform if required. However, we are hopeful we can gather in-person and will be following CDC and University of Washington recommendations on safe gatherings. If health guidelines require us to transition to an entirely virtual meeting, individuals with in-person registration will have the option to receive a full refund or convert to virtual attendance (with a partial refund).

Virtual and in-person [registration](#) is available. Please share this invitation with your trainees and colleagues.

We hope you will join us for the *2<sup>nd</sup> International Symposium on Merkel Cell Carcinoma*.

Warm Regards,

A handwritten signature in black ink, appearing to read "Paul Nghiem".
