

July 21-22, 2022

Updates in Hospital Medicine

This course offered by the University of Washington is directed toward hospital medicine physicians, ARNPs, and PAs. The purpose of the course is to update the skills of inpatient providers with a focus on common problems in clinical care. The format consists of brief, directed live or video presentations followed by discussions where participants will be able to ask the presenters questions. *Hybrid (Online or In-Person at UW Tower).*

August 19-21, 2022

2nd North American Workshop on Vascular Ultrasound

This course is designed to provide basic training for the rheumatologist in performing vascular ultrasound for the diagnosis of large vessel vasculitis. Hands-on training will be a significant component of this activity, partnered with expert faculty in the field, who will discuss and demonstrate how to identify the basic vascular pathological findings. Intermediate to advanced skill in the performance of ultrasound is strongly recommended as a prerequisite to this course. *(In-Person at the Graduate Hotel.)*

August 26-27, 2022

Men's Health Update

Expert faculty has been assembled to provide this update, with presentations on topics such as prostate screening and treatment, testosterone deficiency and the controversy of testosterone replacement, male urinary dysfunction, kidney and bladder pathology, sexual dysfunction, male infertility and the changing influence of marijuana, and genital pain syndromes. During the plenary sessions, attendees will have the opportunity to participate in question & answer sessions. *(Online via Live Webinar.)*

September 12-16, 2-22

50th Annual Advances in Family Medicine and Primary Care & 1-day Infectious Disease Update

This is the 50th year that the Department of Family Medicine at the University of Washington School of Medicine is offering educational opportunities for family medicine and primary care health care providers. Each year our goal is to provide current information about practice skills and the diagnosis and management of a broad array of primary health care issues within family medicine, cardiology, endocrinology, psychiatry and behavioral science, neurology, sports medicine, women's health, pulmonology, nephrology, infectious disease, chronic pain, pediatrics, and gastroenterology. We are also excited to offer a one-day mini-course (Friday, September 16) focused on Infectious Diseases Updates for the busy Family Medicine & Primary Care provider. While you have been distracted by COVID-19, ID care has advanced in many other areas! Please join us and get back up to speed with new information on STI's, Emerging Infections, UTI, Respiratory Infections, Antibiotic Allergies, HIV prevention, Pediatric Infections, and more! *(Online via Live Webinar.)*
